EXECUTIVE SUMMARY

# Where the market places 17 Elysium Road

The sales evidence around Rochedale South supports guiding 17 Elysium Road at **\$1.1M – \$1.2M**. The suburb median is \$1,150,000, and like-for-like homes within Rochedale South have sold from roughly \$1.0M to \$1.17M, with stronger results in adjoining Springwood marking genuine upside if competition builds. A guide in this band is realistic, attractive to the active buyer pool, and already being tested by live interest. The single sale above \$2M nearby sits on a 2,732 m<sup>2</sup> block more than three times Elysium's size — it is not a benchmark.

|                                                       |                                                               |                                                                              |

- ◆ **The market has a clear number.** Like-for-like homes in Rochedale South are trading around \$1.0M–\$1.17M — we recommend guiding at \$1.1M–\$1.2M to reflect that and invite competition.
- ◆ **The \$2M figure has no supporting evidence.** The one nearby \$2M result is a fundamentally different site, and it still achieved only \$733/m<sup>2</sup> — the lowest rate of any sale analysed.
- ◆ **Buyers are already responding.** An offer is in hand and fresh interest is building this week — the opportunity is to convert that into competition, not to hold out for a premium the evidence does not support.

THE SUBURB

# Rosedale South in 2026

Rosedale South has had a strong three-year run. The median house price now sits at approximately **\$1,150,000**, up **17.9%** over the past twelve months — a continuation of steady, sustained growth rather than a speculative spike. That momentum is real, and it supports a confident asking position. What it does not do is lift an 858 m<sup>2</sup> family block into \$2M developer territory.

| YEAR | MEDIAN (HOUSES) | ANNUAL GROWTH | HIGHEST SALE |
|------|-----------------|---------------|--------------|
| 2021 | \$702,000       | +24.7%        | \$1,625,000  |
| 2022 | \$827,000       | +18.6%        | \$1,850,000  |
| 2023 | \$848,000       | +0.8%         | \$1,886,000  |
| 2024 | \$987,000       | +16.5%        | \$2,050,000  |
| 2025 | \$1,097,000     | +11.7%        | \$2,003,000  |
| 2026 | \$1,215,000     | +14.3%        | \$1,810,000  |

The handful of sales that have pushed toward or past \$2M in recent years share one feature: substantially larger land parcels. They are not the benchmark for a standard 858 m<sup>2</sup> residential block, and they consistently take far longer to sell. The pages that follow set out exactly what homes like 17 Elysium are achieving, and why the \$2M expectation does not hold.

THE EVIDENCE · LIKE FOR LIKE

# What homes like 17 Elysium are selling for

Narrowing the field to homes of genuinely comparable size — roughly 810 – 930 m², within one kilometre — gives the clearest read on value. These are the sales a buyer and their valuer will anchor to.

| ADDRESS                   | LAND   | SOLD        | \$ / M² | DAYS |
|---------------------------|--------|-------------|---------|------|
| 8 Lenore Cres             | 817 m² | \$1,388,000 | \$1,699 | 30   |
| 7 Hilarie Ave             | 857 m² | \$1,381,000 | \$1,611 | 23   |
| SPRINGWOOD                |        |             |         |      |
| 5 Hilarie Ave             | 923 m² | \$1,275,000 | \$1,381 | 26   |
| SPRINGWOOD·DOUBLE STOREY  |        |             |         |      |
| 47 Raelene Tce            | 817 m² | \$1,232,000 | \$1,508 | 22   |
| 645 Underwood Rd          | 860 m² | \$1,170,000 | \$1,360 | —    |
| ROCHEDALESOUTH·TWO STOREY |        |             |         |      |
| 39 Mungala St             | 862 m² | \$1,120,000 | \$1,299 | 70   |
| 7 Nerida St               | 819 m² | \$1,015,000 | \$1,239 | 14   |
| ROCHEDALE SOUTH           |        |             |         |      |
| 35 Torview St             | 893 m² | \$1,000,000 | \$1,120 | 27   |
| ROCHEDALE SOUTH           |        |             |         |      |

Subject property: 17 Elysium Road — 858 m². Comparable homes of similar size sold from \$1,000,000 to \$1,388,000.

Within Rochedale South, like-for-like homes sit around \$1.0M – \$1.17M – which is why we recommend guiding at \$1.1M – \$1.2M, with the stronger Springwood results marking the upside.

THE EVIDENCE · FULL DATASET

# All comparable sales within 1 km

Every qualifying sale with in one kilometre, ranked by price. Note how the single \$2M result stands alone — and how it is the only entry on a block above 1,500 m².

| ADDRESS           | LAND     | SOLD        | \$ / M² | DAYS |
|-------------------|----------|-------------|---------|------|
| 22 Rangeview St   | 2,732 m² | \$2,003,000 | \$733   | 555  |
| 13 Ursula Ct      | 1,432 m² | \$1,450,000 | \$1,013 | 229  |
| 8 Lenore Cresc    | 817 m²   | \$1,388,000 | \$1,699 | 30   |
| 7 Hilarie Ave     | 857 m²   | \$1,381,000 | \$1,611 | 23   |
| 5 Hilarie Ave     | 923 m²   | \$1,275,000 | \$1,381 | 26   |
| 10 Dalton Ct      | 1,146 m² | \$1,252,000 | \$1,092 | 5    |
| 47 Raelene Tce    | 817 m²   | \$1,232,000 | \$1,508 | 22   |
| 645 Underwood     | 860 m²   | \$1,170,000 | \$1,360 | —    |
| 39 Mungala St     | 862 m²   | \$1,120,000 | \$1,299 | 70   |
| 109 Springwood Rd | 812 m²   | \$1,101,000 | \$1,356 | 38   |
| 605 Underwood Rd  | 931 m²   | \$1,090,000 | \$1,171 | —    |
| 19 Lisbeth St     | 873 m²   | \$1,020,000 | \$1,168 | 7    |
| 7 Nerida St       | 819 m²   | \$1,015,000 | \$1,239 | 14   |
| 635 Underwood Rd  | 860 m²   | \$1,000,000 | \$1,163 | 146  |
| 35 Torview St     | 893 m²   | \$1,000,000 | \$1,120 | 27   |
| 8 Gills Cl        | 1,017 m² | \$970,000   | \$954   | 25   |

16 sales within 1 km. Median \$1,145,000 · range \$970,000 – \$2,003,000 · \$/m² range \$733 – \$1,699.

# The \$2 million sale is not our benchmark

There is one sale near \$2M in the data— **22 Rangeview Street, at \$2,003,000**. On the surface it looks like proof. In reality it is the clearest evidence *against* a \$2M expectation for Elysium.

## 2,732 m<sup>2</sup>

More than three times the land of 17 Elysium (858m<sup>2</sup>).  
A different class of property entirely.

## \$733/m<sup>2</sup>

Despite the headline price, it achieved the weakest land rate of all 16 sales.  
Big blocks sell at low rates per metre.

## 555 days

Against a suburb average of 87 days — and it was reduced roughly 12% from its first asking price before selling.

## \$2,331/m<sup>2</sup>

To reach \$2M on 858 m<sup>2</sup>,  
Elysium would need \$2,331/m<sup>2</sup> — 37%  
above the best rate any comparable achieved (\$1,699).

## Why there is no developer premium at this size

- ◆ The land is zoned for a single dwelling under LoganCity's slow-density residential provisions — there is no density or subdivision upside to fund a premium at 858 m<sup>2</sup>.
- ◆ Every comparable buyer in the data is an owner-occupier family, not a developer — the buyer pool paying these prices is residential.
- ◆ The one large site that would interest a developer (Rangeview) still made only \$733/m<sup>2</sup> and took 18 months to sell — the market does not pay up for scale here.
- ◆ No sale in the dataset, at any size, has exceeded \$1,699/m<sup>2</sup>. A \$2M result on Elysium has no precedent anywhere in the evidence.

## THE LIVE MARKET

# The market is already speaking

We are not working from theory. There is a **\$950,000 offer already in hand**, and genuine fresh interest building this week. That early activity is doing exactly what we want — it is establishing a floor and testing the market in real time.

## How to read the \$950,000 offer

At \$950,000 the offer sits below the recommended guide and below all but the very lowest comparable sale — so it is best treated as an opening position rather than a landing point. Its real value is as leverage: it confirms live demand and gives us a floor to build competition above. With more interest arriving this week, the strategy writes itself.

- ◆ **Guide to the evidence.** Present buyers with the \$1.1M–\$1.2M guide, backed by the comparable sales in this brief.
- ◆ **Create competition.** Bring the current offer and new enquiry into the same window so buyers compete rather than negotiate in isolation.
- ◆ **Hold the line on \$2M.** Anchoring to an unsupported figure risks extended days on market — the exact outcome Rangeview illustrates.

---

The goal of the meeting is a shared, evidence-based expectation: guide 17 Elysium Road to the market at **\$1.1M – \$1.2M**, convert the interest already in play, and set aside the \$2M figure as unsupported by any comparable sale.

## Phrases to use in the room

*“The market has already given us a range – the local sales all sit between \$1.0M and \$1.2M.”*

*“The only \$2M sale nearby is on three times the land, and it still took eighteen months to sell.”*

*“To get to \$2M we’d need a rate no property in this suburb has ever achieved.”*

*“We already have a live offer and fresh interest – let’s turn that into competition at the right number.”*

## Next steps

- 1 Agree a guide of \$1.1M–\$1.2M and a launch method for the coming week.
- 2 Respond to the \$950,000 offer as an opening position; invite an improved figure.
- 3 Bring this week’s new enquiry through and set a common offer window to build competition.
- 4

# Global Reach & Results

Queensland | Sotheby's  
INTERNATIONAL REALTY

JANUARY 2025

The background is a complex abstract composition. It features soft, blended watercolor textures in various shades of blue, teal, and grey. Overlaid on these are several geometric and celestial elements: thin white lines forming right angles and arcs, small white dots resembling stars, and larger circles. Some of these circles have a detailed, cratered texture, similar to the moon, while others are solid or have a subtle gradient. The overall effect is a sense of depth and cosmic exploration.
